MAVVIS

K2
SURFACES

ALL WHEN IT RAINS

Advantages

EASE OF INSTALLATION

In order to simplify the work of the installers, Mavis is divided into two products; the line with base metal DX51D is harder and is recommended for gutter production, while the line with base metal DX53D is softer and malleable, ideal for roofing with double lock standing seam.

ECOLOGICAL AND RECYCLABLE

Mavis is atoxic and **100%** recyclable

UV RESISTANT

UV resistant also at high altitudes. More weatherproof than normal surfaces. More long-lasting.

SCRATCH-RESISTANT

Scratch-resistant to facilitate operator's activity and to achieve a more aesthetic result for his customer.

The trademark Mavis identifies a grouping of prepainted steel strips with specific features meant for roofing and cladding, as well as for the production of gutters and roofing accessories. Mavis is highly UV and full-depth corrosion resistant. In order to simplify the work of the installers, Mavis top coating is extremely scratch-resistant.

Colour assortment

All colours are available with stucco surface

COPPER ROOF

✓ metallic colour

Exclusively manufactured by

RAL 7037

RAL 7016

RAL 9006

TESTA DI MORO

RAL 9002

Color available in DX51 only

The ROOF colors may show a natural non-homogeneity of the coating color tone between different production lots.

The metallic colors may show slight differences in color tone between different production lots.

Accessories

MAVIS - ROOFING QUALITY

This material is available with stucco surface only.
